

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A method for providing a user with an album including a plurality of pages, the method comprising the steps of:
 - (a) allowing a user to purchase at least a portion of the album, the portion of the album including a portion of the plurality of pages;
 - (b) allowing the user to set a plurality of defaults for the plurality of pages, at least one default of the plurality of defaults capable of being altered using information provided by the user;
 - (c) receiving from the user the information, if any, and a plurality of images captured using a digital imaging device, wherein the information receiving step (c) further includes the step of:
 - (c1) receiving a tag stored in at least one image file for a first portion of the plurality of images, the tag for altering the at the least one default of the plurality of defaults for the first portion of the plurality of images, wherein the tag received in the image file in step (c1) is received in a communication that is separate from the user setting the plurality of defaults in step (b) and that initially provides the first portion of the plurality of images;
 - (d) altering the at least one default if the user has provided the information;
 - (e) providing the portion of the plurality of pages using the plurality of defaults; and
 - (f) allowing the user access to the at least the portion of the album.

2. (Original) The method of claim 1 wherein the purchasing step (a) can occur prior to receiving the plurality of images from the user.

3. (Previously Presented) The method of claim 1 wherein the purchasing step (a) can occur prior to the plurality of images being captured.

4. (Previously Presented) The method of claim 1 wherein the receiving step (c) further includes the step of:

(c2) receiving from the user the information, if any, and the plurality of images directly from the digital imaging device.

5. (Original) The method of claim 1 wherein the album is a printed photo album and wherein the access allowing step (f) further includes the step of:

(f1) providing the portion of the plurality of pages to the user.

6. (Previously Presented) The method of claim 5 wherein a second portion of the plurality of images include sound and wherein the step of providing the portion of the plurality of pages further includes the steps of:

(e1) printing the portion of the plurality of pages; and

(e2) providing a mechanism for a user to hear the sound for the second portion of the plurality of images.

7. (Previously Presented) A method for providing a user with an album including a plurality of pages, the album being a printed photo album, the method comprising the steps of:

- (a) allowing a user to purchase at least a portion of the album, the portion of the album including a portion of the plurality of pages;
- (b) allowing the user to set a plurality of defaults for the plurality of pages, at least one default of the plurality of defaults capable of being altered using information provided by the user;
- (c) receiving from the user the information, if any, and a plurality of images captured using a digital imaging device, wherein a portion of the plurality of images include sound, wherein the information receiving step (c) further includes the step of:
 - (c1) receiving a tag stored in the at least one image file for a first portion of the plurality of images, the tag for altering the at least one default of the plurality of defaults for the first portion of the plurality of images, the tag received in the image file in step (c1) is received in a communication that is separate from the user setting the plurality of defaults in step (b) and that initially provides the first portion of the plurality of images;
- (d) altering the at least one default if the user has provided the information;
- (e) providing the portion of the plurality of pages using the plurality of defaults, the portion of the plurality of pages providing step (e) further including the steps of
 - (e1) printing the portion of the plurality of pages; and
 - (e2) providing a mechanism for a user to hear the sound for the portion of the plurality of images wherein the mechanism includes a printed stripe playable by a scanning device and wherein the providing step (e1) further includes the step of:
 - (e1i) providing the scanning device to the user; and

(f) allowing the user access to the at least the portion of the album by providing the portion of the plurality of pages to the user.

8. (Original) The method of claim 6 wherein the mechanism providing step (e2) further includes the step of:

(e2i) providing a user playable device within a second portion of the portion of the plurality of pages, the second portion of the plurality of pages including the portion of the plurality of images including sound.

9. (Original) The method of claim 1 wherein each image of a portion of the plurality of images includes a caption and wherein the providing step (e) further includes the step of:

(e1) providing the caption for each of the portion of the plurality of images.

10. (Original) The method of claim 9 wherein the caption for each of the portion of the plurality of images is a user-recorded caption and wherein caption providing step (e1) further includes the step of:

(e1i) reading the user-recorded caption for each of the portion of the plurality of images;

(e1ii) converting the user-recorded caption for each of the portion of the plurality of images to a text caption; and

(e1iii) printing the text caption for each of the portion of the plurality of images.

11. (Original) The method of claim 1 wherein the at least one default includes a page layout.

12. (Original) The method of claim 1 wherein the at least one default includes a page style.

13. (Original) The method of claim 1 wherein each image of a portion of the plurality of images includes a category and wherein the at least one default includes a photo album organization based on the category of each image of the portion of the plurality of image.

14. (Original) The method of claim 1 wherein the at least one default includes selecting image analysis for the plurality of images.

15. (Original) The method of claim 1 wherein the purchase step (a) further includes the step of:

(a1) allowing the user to purchase the at least the plurality of pages from a remote location.

16. (Previously Presented) The method of claim 1 wherein the at least one default selecting step (b) further includes the step of:

(b2) allowing the user to select the at least one default from a remote location.

17. (Original) The method of claim 1 wherein a portion of the plurality of images include sound and wherein the step of providing the portion of the plurality of pages (e) further includes the steps of:

- (e1) archiving the portion of the plurality of pages; and
- (e2) providing a mechanism for a user to hear the sound for the portion of the plurality of images.

18. (Original) The method of claim 17 wherein each image of a portion of the plurality of images includes a caption and wherein the archiving step (e1) further includes the step of:

- (e1i) providing the caption for each of the portion of the plurality of images.

19. (Original) The method of claim 18 wherein the caption for each of the portion of the plurality of images is a user-recorded caption and wherein caption providing step (e1i) further includes the step of:

- (e1ia) reading the user-recorded caption for each of the portion of the plurality of images;
- (e1ib) converting the user-recorded caption for each of the portion of the plurality of images to a text caption; and
- (e1iic) printing the text caption for each of the portion of the plurality of images.

20. (Previously Presented) A system for providing a user with an album including a plurality of pages, the system comprising:

at least one storage subsystem for storing an identity of a user who has purchased at least a portion of the album and a plurality of defaults for the plurality of pages, a portion of the plurality of defaults capable of being set by the user, at least one default of the plurality of defaults capable of being altered using information provided by the user; and

a server for receiving a plurality of images captured by a digital camera and provided by the user, the server also for receiving information provided by the user, if any, altering the at least one default if the user has provided the information, the server for providing the portion of the plurality of pages using the plurality of defaults;

wherein the information includes a tag stored in at least one image file for a first portion of the plurality of images, the tag for altering the at least one default for the first portion of the plurality of images; and

wherein the server receives the tag stored in the at least one image file from the user in a communication that is separate from receiving the plurality of defaults and that initially provides the first portion of the plurality of images to the server.

21. (Original) The system of claim 20 wherein the user can purchase the portion of the plurality of pages prior to the server receiving the plurality of images.

22. (Original) The system of claim 20 wherein the user can purchase the portion of the plurality of pages prior to the plurality of images being captured.

23. (Original) The system of claim 20 wherein the server receives from the user the information, if any, and the plurality of images directly from the digital imaging device.

24. (Original) The system of claim 20 wherein the album is a printed album and wherein the system further includes:

a printing means for printing the portion of the plurality of pages.

25. (Previously Presented) The system of claim 24 wherein a second portion of the plurality of images include sound and the system further provides a mechanism for a user to hear the sound for the portion of the plurality of images.

26. (Previously Presented) A system for providing a user with an album including a plurality of pages, the album being a printed album, the system comprising:

at least one storage subsystem for storing an identity of a user who has purchased at least a portion of the album and a plurality of defaults for the plurality of pages, a portion of the plurality of defaults capable of being set by the user, at least one default of the plurality of defaults capable of being altered using information provided by the user;

a server for receiving a plurality of images captured by a digital camera and provided by the user, the server also for receiving information provided by the user, if any, altering the at least one default if the user has provided the information, the server for providing the portion of the plurality of pages using the plurality of defaults;

a printing means for printing the portion of the plurality of pages;

wherein the information altering the at least one default is received from the user in an image file a communication that is separate from the plurality of defaults being set and that initially provides the first portion of the plurality of images to the server;

wherein the a portion of the plurality of images include sound and the system further provides a mechanism for a user to hear the sound for the portion of the plurality of images; and

wherein the printing means further prints a stripe playable by a scanning device and wherein the scanning device is provided to the user.

27. (Original) The system of claim 24 wherein each image of a portion of the plurality of images includes a caption and wherein the printing means further provide the caption for each of the portion of the plurality of images.

28. (Original) The system of claim 27 wherein the caption for each of the portion of the plurality of images is a user-recorded caption and wherein server further reads the user-recorded caption for each of the portion of the plurality of images and converts the user-recorded caption for each of the portion of the plurality of images to a text caption.

29. (Original) The system of claim 20 wherein the at least one default includes a page layout.

30. (Original) The system of claim 20 wherein the at least one default includes a page style.

31. (Original) The system of claim 20 wherein each image of a portion of the plurality of images includes a category, and wherein the at least one default includes an album organization

based on the category of each image of the portion of the plurality of image and wherein the server further categorizes the portion of the plurality of images.

32. (Original) The system of claim 20 wherein the server is further capable of providing image analysis.

33. (Original) The system of claim 32 wherein the at least one default includes selecting image analysis for the plurality of images.

34. (Original) The system of claim 20 wherein the album is a web album and the system further includes:

a database for archiving the plurality of images in the portion of the plurality of pages.

35. (Original) The system of claim 34 wherein a portion of the plurality of images include sound and wherein the server further provides a mechanism for a user to hear the sound for the portion of the plurality of images.

36. (Original) The system of claim 35 wherein each image of a portion of the plurality of images includes a caption and wherein the database further archives the caption for each of the portion of the plurality of images.

37. (Original) The system of claim 36 wherein the caption for each of the portion of the plurality of images is a user-recorded caption and the server further reads the user-recorded

caption for each of the portion of the plurality of images and converts the user-recorded caption for each of the portion of the plurality of images to a text caption.

38. (Previously Presented) A method for providing a user with an album including a plurality of pages, the method comprising the steps of:

- (a) allowing a user to purchase at least a portion of the album, the portion of the album including a portion of the plurality of pages;
- (b) allowing the user to set a plurality of defaults for the plurality of pages in a first session;
- (c) receiving from the user the information, if any, and a plurality of images captured using a digital imaging device, wherein the information is capable of altering at least one default of the plurality of defaults for a first portion of the plurality of images, the information and the plurality of images being received from the user in an image file in a second session that is separate from the first session in which the user is allowed to set the plurality of defaults and that initially provides the first portion of the plurality of images;
- (d) altering the at least one default if the user has provided the information;
- (e) providing the portion of the plurality of pages using the plurality of defaults.
